14	MAIN VOX wet (100%)	P2	see above			WET! (100%)

LUNAR SPACE TAPES

sound suggestions and infos:

We play some kind of psychedelic-rock music (:

- **Kickdrum** does not need much kick, sound should be more on the mellow side.
- On **drum signals**: please do not use any Gates.
- **BACKING-VOX** (Drums) prefers a bit of small room if possible.
- **MAIN-VOX** (Guitar) has own VOCAL-FX-pedal on stage. **Please note: 2 Channels, one dry and one wet (100%)**
- **Guit. and Bass** do not need any extra FX.
- **Sampler** is only used in 2 spots in the set, we have a little INTRO Sequence to set up atmosphere
2nd time sampler sequence is played before one song (**23**) in the set.

monitor-settings:

GUITAR/VOX	(Chris) :	main-vox, sampler	(other instruments balanced locally by FOH).
DRUMS	(Stefan) :	back-vox, main-vox, sampler.	(other instruments balanced locally by FOH).
BASS	(Christian):	main vox, sampler	(other instruments balanced locally by FOH).
